Description

The **New Car Showroom** is a custom ad unit used to feature a vehicle prominently on the KBB homepage. It is designed to look integrated with the page content, and gives the advertiser the opportunity to include their own branded message and image.

There are several options that can be used to promote and enhance the vehicle brand:

New Model Release (Option A)

The New Model Release option is designed to promote new car launches even if the vehicle hasn't gone "live" on KBB.

It includes "quick glance" features about the vehicle and a link to the OEM website to learn more.

Sales Events (Option B)

The Sales Events option can be utilized by the OEM throughout the year to take advantage of seasonal promotions. Both options can be used to enhance a vehicle's brand image by highlighting specific features of a desired model with a special section embedded on the page to call out a unique feature.

The New Car Showroom is assembled (custom-built) by Kelley Blue Book, and then returned to the advertiser for approval. One creative will be built per flight and there is a limit of one click-through URL assigned per creative. Of course, any previous KBB-built creative may be rotated in to the ad server, if desired.
